400 TONS... MAXIMUM LIFTING CAPACITY !

"IN SWITZERLAND, KNOW-HOW AND PRECISION ARE OUR RAW MATERIALS!"

Our most recent machines, with a capacity from 400 kilos to 400 tons, are capable of carrying out the most complex lifting maneuvers. Their daily tasks include the constructing and disassembling of tower cranes, lifting linked to the industry sector as well as the world of exhibition events. Thanks to a perfect knowledge of the architectural settings, technical manuals, material and physical.

For installing your laboratory equipment on the 5th floor of your new research center, the training of our specialized employees was one of our best moves. We can imagine the huge static constraints, in weight, height and depth that this can represent. Without even mentioning the security measures that need to be taken into account.

We guarantee a smooth, efficient and reliable operation due to our experience, and together with our onsite personnel we will fulfill your expectations and complete the task you have entrusted us with. Added to our efficiency in this field, you can also call our engineers who will help you with your requests down to the millimeter and create a transport medium or the ideal lifting accessory. Our mechanical workshop and its central locksmith can guarantee a made to measure plan from the engineering. Good ideas are always at your disposal.
