SPECIAL 

3'500 KM OF ACTION RANGE... AND SOMETIMES MUCH MORE!

"IN SWITZERLAND, KNOW-HOW AND PRECISION ARE OUR RAW MATERIALS!"

Even before travelling the first kilometer, it is fundamental to take into consideration the five main settings which govern our transport activities: length, width, height, weight and notice. Moving an object from A to B also requires a perfect knowledge of the itineraries, the dimensions and the load distribution, as well as the mechanical parameters. We put this together with the road legislations and the custom officials of the various countries we travel through.

Thanks to our wide experience across Europe and as far as the Middle East, we can guarantee you a total control of all the elements ranging from the preparation of the loading to the delivery to your clients. Like a Swiss watch, punctuality and innovation are valuable assets to us. Our experienced and multilingual team, equipped with machines of the latest technology, will take care of your delivery.

Our teams work together to organize turnkey projects: road or railway transports – air or sea freight – loading or offloading operations: you can trust us and our partners!
