# 5'000 M2... TO MOVE OR READY TO WELCOME YOU !

«IN SWITZERLAND, KNOW-HOW AND PRECISION ARE OUR RAW MATERIALS!»

From time to time it may be necessary between a machine leaving the factory and starting work, that a period of time may have to be spent in temporary storage, or a period of assembly, or, in certain cases, it sometimes arrives that a company must move completely.

As a key player in the industrial world, your company must be present at an exhibition stand. This is not an easy task and in every case involves meticulous research and planning.

Our job: To help you with this task, studying and creating the project for you. We guarantee, with our level of professionalism in these matters and in the domain mentioned above, that we can manage your project perfectly from beginning to end. Our specialized lifting equipment is adapted for this type of handling.

From the moment a machine stops, the dismantling, the transport and the reassembling, each step is handled with care and total commitment, and everything is organized right to the last detail of the retro fit. And, if for any reason, the transfer cannot be made straight away, our storage facilities, equipped with cranes, can easily take any type of material or machines for simple storage or undergoing assembly or testing.
